Toward an Islamic Legal Framework

(Presented online)

We, Muslim women of the world, on this date of July 2021, Dhul-Hijjah 1442 Hijri, are determined to secure and advance Muslim women's rights as revealed in the Qur'an and exemplified by the Sunnah of Prophet Muhammad . We envision a world in which Muslim women are instrumental in creating a peaceful and prosperous world anchored in gender equality and human dignity.

Building on Historic Precedent

We honor the long history of Muslim women leaders who came before us, those who through their dedication to Allah and valiant leadership stand out as luminaries of the Islamic faith: Hagar, the matriarch of monotheism, courageously remained in Mecca and founded the town with her son Ismail; Khadijah was the first to embrace Islam and supported the Prophet's mission; Um Salama protected the folios of the Quran against corruption, Aisha collected 2,000 Hadiths that are still used today; Amrah was the first woman jurist whose opinions overrode those of her contemporaries; Sumayyah was the first Muslim martyr who fought alongside the Prophet : Sayyidah Nafisa of Egypt best known scholar of hadith, taught Imam Al-Shafi and performed his Salat al-Janazah, funeral prayer, in accordance with his will, Rabi'a al-Adawiyya of Iraq, in devotion to Allah, coined the expression of divine love; Nana Asma'u of Nigeria, a prolific poet and author championed universal education for women; and Fatima al-Fihri of Morocco founded the first and oldest (madrasah) university in existence today. We draw our inspiration from the same Book, the Quran, and its first living embodiment Prophet Muhammad 🚎 that these Muslim women followed. Their universally acknowledged contributions to Islam fortify our conviction that Muslim women all over the world have major roles to play in strengthening their communities and interpreting their faith in ways that are resilient, contributive and adaptive. We are further inspired by the diversity of 21st century women, fifteen (15) of whom have led Muslim majority nations, three (3) are Noble Laureates, Anousah Ansari, an astronaut has been on an exploratory mission to space, Fatma Alive Topuz a Turkish novelist, in book Nisvan-ı İslam ("Women of Islam") explained Muslim women to western readers and scores of other women whose courageous achievements have seen the status of women lifted around the world.

Still, there is much progress to be made. There is a glaring disconnect between the righteous teachings of Islam and the unjust conditions experienced by a vast majority of the 750 million Muslim women, comprising 1/10th of humanity. Despite Quranic teachings and the Prophet's (\$\frac{m}{m}\$) precedent, many women remain egregiously disenfranchised, aggrieved, oppressed, and deprived of their sacred rights. The autonomy of many women is denied in many parts of the world, her intelligence, confidence and respect are
